Study in Europe!

Are you a second-year Civil engineering student at the UBC Okanagan campus interested in studying in Scotland in January 2019?
Coordinated International Experience Program - UBC OKANAGAN CIVIL STUDENTS

UBC’s Coordinated International Experience (CIE) is an initiative offering UBC Faculty of Applied Science students a chance to study abroad, full time for a semester at a leading CIE partner institution in Asia, Australia, or Europe. Entry into the CIE program is competitive. To be eligible, UBC Okanagan School of Engineering students must be available to go abroad during their third year, second term, have at least a 70% average in the most recent academic term of full time studies prior to application (and maintain a 70% average prior to your exchange departure), and be a full-time student in good academic standing. Students accepted by a CIE partner institution are eligible to receive a $1,000 award for travel support from the Faculty of Applied Science.

Benefits for Participating CIE Students:
• Courses taken at CIE partner institutions are pre-approved for UBC Okanagan campus Engineering degree credit requirements.
• Students pay UBC Okanagan campus tuition when studying at a CIE partner university.
• Transcripts are provided to document the student’s stay at an international partner institution.
• Resume and future career opportunities are enhanced by international experience.

Students participating in the CIE program will take an additional design elective in lieu of a technical elective in the fourth year, thus only three technical electives will count towards your degree.

The following partner institution courses in Europe have been pre-approved for transfer credit at the Okanagan campus. Divide the total ECTS by 2 to calculate the equivalent UBC credits. For additional courses outside of this list, please contact CIE for approval.
